Attention Farmers who are said to Are You Going West !

Attention Farmers who are said to have Been Fooled by buying our Iron Beam Plows.

Beam Plows.

We see by an advartisement in has week's county papers, that many of you had been footed by onying from Beam Plows, because they were not made at Gowands, N.Y., and as we are making from Beam Plows in this place, we take it that they think you have been footed by buying our Plows. For the past three years we have had very many calls for the Curits from Beam Plows, made by Hiram Curits, at Albion, N. Y. and after being urged by many of the good farmers in this and adjoining counties, to make the gennine Curits Plow in Warren, so that they might have a guarantee of getting duplicate parts of plows when worn outweed dediction of the patterns. We then hot from Hiram Curits, the inventor of said plow, at Albion, N. Y. the gentine No. 2: we decided to get the patterns. We then bot from Hiram Curties, the inventor of said plow, at Albion, N. Y., the genuine No. 22 Iron Beam Plow pattern, and are now making large quantities of them and have mad them sold by our agents in nearly every town on the Western Reserve, also through Western Far, and lare never had a complaint of the working or draft of the plow, and in sunny places are selling them to desilers who have been selling the Gowanda Plow, and now prefer ours on account of improvements made on them, among which is a raised mouldboard, thereby avoiding all danger of loose sail falling over back of mouldboard. Also have made the wing part of point it, inches wider, and have a steel laid coulier, which will certainly out its way through the soil with lessofrant than the Gowanda plow does with a cheap wrought iron coulter. As regards our compeliors fearing too many of you would be fooled by but ing our plows, we say to you how, as we did when you bo't your plows, if you are not satisfied with them, or if the many unnuit and ungentlemantly statements made by our compeliors who are ignorant enough to think that a plow must be made at Gowanda, N. Y., to be genuine, or of any value, we say to you to on't or return your plow to us and we will not only return your plow to us and we will not only return your plow to us and we will not only return your plow to us and we will not only return your plow to us and we will not only return your plow to us and we will not only return your plow to us and we will not only return your plow to us and we will not only return your plow to us and we will not only return your plow to us and we will not only return your plow to us and we will not only return your plow to us and we will not only return your plow to us and we will not only return your plow to us and we will not only return your plow to us and the return y

out pay you for your time and trouble in returning it.

Asregards our points we are making them by a new process of refining and hardening from and will warrant them as hard and durable as any made in Gowanda, N Y.—We think with an experience of 30 years in the plowbusiness, we have certainly learned how to make so simple an article as a plow point.

bow to make so simple an article as a plow point.

As regards the enormous amount of plows sold by our competitors we think it sounds very gassey to read of men see ling 500 Gbw and a plow in Warren, in one year, when it is a fact that they have not sold 600 plows since they were born into this worid.

Farmers, we do not think it necessary to have the number and name of a plow in guilt letters do not make a good plow (guilt letters do not make a good plow). We think our competitors show their guilt plain mough without having it stamped on their plow. We would be pleased to have all in want of a plow call and see our plow before purchasing. We think you will be convinced we are making a good plow and a good point. Please call and see at our store. No. 3, Main St., or at Foundry, corner Canal and Liberty St.

JAMES REED & SON.
